

OBITUARY

PROFESSOR DR. PASHYA ROBERTO KAPLAN

It is informed with great sorrow & grief that Dr. Pashya Roberto Kaplan left for eternal abode. He was associated with us as a member of Editorial board for last 5 years. His contribution to the Medical field was inspiration for all of us.

Dr. Roberto Kaplan, born in South Africa in 1948. He started his training in Johannesburg in preparation for a doctor of optometry. After a short time in Durban, South Africa, he went to Houston, Texas to specialize in vision therapy. A short time later, he received a professorship to advance his research, which he later continued in Oregon.

He transferred this principle and the knowledge that there is a holistic cause behind every symptom to visual disturbances. It soon became his trademark to see the eye and the people behind it as a whole and found new ways to solve old problems.

He continued his interdisciplinary training and was able to take a wide variety of perspectives when considering a problem. This gave rise to the KaplanEyeCode® and later developed Energetic EyeHealing he brings in the energy of his Sanskrit name "Pashya Roohani". The meaning of the name is: "one who sees with the eye of spirit". With his method he helped to see the people behind his eyes people all over the world and offers natural healthy solutions that mostly not only have an impact on the eyes, but on life as a whole. He has published 5 books (Concious seeing, seeing without glasses, energetic EyeHealing, integrated vision therapy, using pinholes) on his work in different languages.

Unfortunately, Roberto died in Stuttgart/Germany in December 2019 after a short serious illness. He leaves a big gap in the field of optometry and in the life of his wife Vistara, his 2 sons and the friends.

May his soul rest in eternal peace.
